## About Us

Preptec supply an extensive range of multi brand surface preparation and related equipment, spare parts and consumables.

Main dealers with over 25 years of experience and knowledge in the surface preparation industry. We offer our customers a comprehensive choice of machinery solutions from a number of leading manufacturers to suit all applications. Our core focus is supplying the best equipment for the job combined with a high level of customer service.

## Equipment and Machinery

Preptec stock a wide range of equipment available to view in our showroom. We also have a demonstration area where customers can test equipment prior to supply. Whatever your requirement may be, we work with our clients to arrive at the best solution to suit the application and budget. We will ensure you have the best tools available for the job.

### Shot blasters

Preparation of concrete and steel surfaces. Prepares the high and low points of the surface. Provides an excellent key for the application of coatings and overlays.

### Planers

The surface is prepared by using different types of cutter fitted to a cylindrical drum. Provides a more aggressive method of preparation.

### Mixers

For the effective mixing of resins, screeds, repair mortars, adhesives, paint and sealants.

### Floor Grinders

Preparation and polishing of floor surfaces, removal of old coatings, adhesive and contaminants. Removal of high spots and levelling of floors.

### — Strippers

Used for the removal of sheet vinyl, carpet, linoleum and failed screeds.

### — Dust Control

For use with surface preparation equipment, hand tools and industrial cleaning applications.

### — Generators

Portable high powered multi-phase generators ideal for running all types of floor preparation equipment, screed pumps and dust collectors.

## Ex demo and used equipment

Preptec have a selection of ex display, ex demo, reconditioned and used equipment available.

This equipment is tested by our workshop and supplied with a warranty. The used equipment listing on our website is amended regularly so please check for updates.

## Diamond Tooling

Preptec diamond tooling has been developed for the European market to provide a premium quality, highly productive and competitively priced tooling solution. Many years of experience in the floor preparation and polishing market has resulted in a popular range of tooling to fit the majority of grinding equipment. We offer improved methods of tool fixing, increased grinding speeds and longer tool life.

### Fastfit™

A popular grinding system for use with most types of floor grinding equipment.

Fastfit tooling can be changed in seconds allowing the easy change of worn tooling or to another grit or bond. This system supersedes the original trapezoid type tooling that is held in place with fixing screws. Tools are available in a range of grit sizes and bonds for surface preparation and polishing requirements.

### — Grinding tools

Grinding segments available in a choice of 16/30/80/120 grit sizes and in hard, medium, soft and extra soft bonds to suit a wide range of concrete grinding applications.

### — PCD tools

PCD segments for the aggressive removal of thick coatings, levelling compounds, adhesive and membranes. Polycrystalline tooling is extremely hard and effectively shreds the material to be removed. PCD tools are available in standard / arrow segment configurations and in clockwise / anticlockwise rotation.

### — Split PCD

Grinding tools with fractured pieces of PCD embedded in a grinding segment. Split PCDs are a very coarse grinding tool suitable for the rapid removal of floor coatings and thinner floor coverings when a full PCD tool maybe too aggressive.

## Fastfit™ Tool Plates

A wide range of tool plates are available to fit most types of floor grinding equipment to allow the fitment of Fastfit and Redilock diamond tooling.

## Grinding Plates

Premium quality 250mm universal fit grinding plates for use with most types of floor grinder.

### — 250mm 30 Grit Grinding Plate

250mm 30 grit grinding plates are available in hard, medium and soft bond to suit the application of concrete grinding, also suitable for removing thin floor coatings and contamination.

### — 250mm PCD Grinding Plate

250mm PCD grinding plates are available in clockwise and anticlockwise configuration to suit grinder rotation. An aggressive tool design for the removal of thick coatings, levelling compounds and adhesives.

### — 250mm 10 Grit Coarse Grinding Plate

250mm 10 grit coarse grinding plate for faster stock removal and coating removal when a PCD tool maybe too aggressive.

## Cup Grinding

A range of high quality diamond grinding cup wheels designed for use on hand held grinding equipment. Available in different sizes and configurations.

### — 7" / 180mm and 5" / 125mm Turbo Cup Disc

7" / 180mm and 5" / 125mm turbo cup discs 30 grit available in medium and soft bond to suit concrete hardness. 7" discs are available with 6mm and 10mm deep segment options. For concrete grinding and thin coating removal.

### — 7" / 180mm and 5" 125mm PCD Cup Disc

7" / 180mm and 5" 125mm PCD cup discs for aggressive removal of thicker coatings, adhesive, levelling compounds and membranes.

### — 7" / 180mm Coarse 10g Cup Disc

7" / 180mm coarse 10g cup disc for faster stock removal and coating removal when a PCD tool is too aggressive.

## Cutting & Chasing

A comprehensive range of high quality fast cutting tooling for hand grinding, disc cutting and floor saw equipment. Tuck point tools are also available for crack chasing prior to concrete repair.

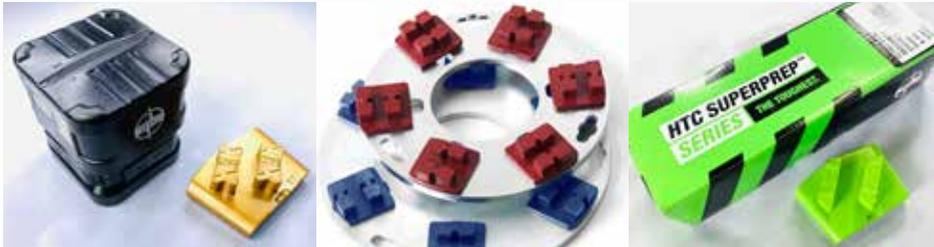

## Polishing

A wide range of resin and ceramic tooling, densifier, grout and floor sealers used in the process of concrete polishing to create a desirable floor finish.

## OEM Tooling

Preptec also supply a full range of premium quality Husqvarna & HTC tooling used in surface preparation and concrete polishing to achieve Hiperfloor and Superfloor specifications.

## Preptec Showroom

Evaluate the equipment before you buy.

Preptec Equipment Services Ltd  
Unit 4 Stirlin Point, Sadler Road,  
Lincoln, LN6 3RG

## Dust Cows

Supplied to suit 9" and 5" hand grinders with cup discs fitted. When connected to a suitable dust control vacuum the operation is dust free.

## Hand Grinders, Polishers & Chasers

9", 7" and 5" high powered hand held grinders, polishers and chasers.

Used for edgework, smaller inaccessible areas and cutting/chasing floors.

## Cutting Guards

Supplied to suit 9" and 5" hand grinders with cutting and chasing tools fitted.

Operation is dust free when connected to a suitable dust control vacuum.

## Consumables, Spare Parts and Accessories

We supply a comprehensive range of quality replacement consumables and spare parts for use with most brands of surface preparation and related equipment.

### Floor Planers

- TCT cutters
- Beam cutters
- Milling cutters
- Replacement cutter drums
- Flail shafts

### Floor Grinders

- Diamond tooling
- Carborundum blocks
- Brushes
- Flexi couplings

### Stripping Equipment

- Replacement blades

### Dust Control Vacuums

- Heavy duty hose
- Floor tools
- Filters PTFE & HEPA
- Replacement motors

### Electrical

- Transformers 110v
- Extension Leads 110v
- Extension Leads 415v

### Shot Blasting

- Blastwheel kits
- Liners
- Seals
- Brushes
- Poly ducting
- Abrasives
- Dust collector filters

### Rotary Preparation

- Sanding discs
- Tungsten carbide discs
- Sandscreen discs
- Diamond pads
- Cleaning pads
- Drive plates
- Brushes
- Dust cowls

### Mixing/Application

- Steel mixing drums
- Mixing paddles
- Screed sledges
- Rollers
- Pin rakes
- Trowels

## Equipment Hire and Rental

Preptec supply equipment to a number of leading equipment rental outlets throughout the UK.

Working in partnership with these suppliers we can arrange equipment rental nationwide. We can also offer a selection of equipment for collection from our Lincoln head office to order and the possibility of specialist equipment on a hire to buy option.

### Equipment Training

#### Operate your Equipment Safely

Preptec offer manufacturer backed instruction on the use and maintenance of the equipment we supply. It is essential that all users fully understand how to use equipment safely and effectively on site. Training can be conducted at our head office or on site as required.

### Service and Repairs

Sensibly priced repair and servicing of most types of surface preparation and related equipment. All work is carried out by experienced personnel. We are listed as an official service centre for Wollf equipment.
