

TVS Multisport Tiles

TECHNICAL INFORMATION

Forget cancelled games due to flooded fields, because **TVS Multisport Tiles** have been designed to quickly drain water. Thanks to the development of our unique surface, your outdoor sports area will always be ready to play.

Outdoor courts with vertical shock absorption are now a reality. With TVS Multisport you can have water drainage and comfort in your outdoor court. All this thanks to the application of a special foam underlayment beneath the tiles.

Material

Tiles made with an own formula of polypropylene copolymer with UV stabilizer. This assures a high mechanical resistance to impact and the durability of the aspect of each tile. Matt finishing without shine.

Maintenance

No maintenance needed, except a periodic cleaning of the surface to maintain the perfect preservation and appearance and below the tiles to clean any accumulation of dirt.

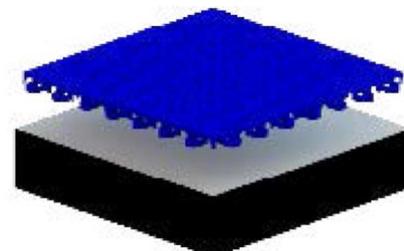

General Characteristics

- Simple and fast assembly and disassembly allows the use of the space for other activities if needed. No need for fixating accessories.
- Easy and simple repairs: In case of a damaged area on the sports floor you just need to replace the damaged tiles.

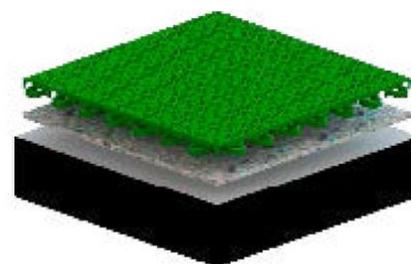

Ramps

Dimensions: 25 x 5cm
